

I claim:

1. A fluid dispenser comprising a container, a suction tube, a dispensing tip, and a pump mechanism, said suction tube being disposed within the container, said pump mechanism secured to  
5 the container, said pump mechanism being in fluid communication with the suction tube, said fluid dispenser further comprising a wire attached to the suction tube.
2. The fluid dispenser of claim 1 wherein the wire comprises a plastic wire.
- 10 3. The fluid dispenser of claim 1 wherein the wire comprises a resilient material.
4. The fluid dispenser of claim 1 wherein the wire is substantially helical in shape.
5. The fluid dispenser of claim 1 further comprising an  
15 ornament attached to the wire.
6. The fluid dispenser of claim 5 wherein the ornament is a representation of a leaf.
7. The fluid dispenser of claim 5 wherein the ornament is a representation of a flower.
- 20 8. The fluid dispenser of claim 5 wherein the ornament is a figure.
9. The fluid dispenser of claim 5 wherein the ornament is a letter.
10. The fluid dispenser of claim 5 wherein the ornament has a  
25 receiving bore sized and dimensioned to receive the wire within

the receiving bore, said ornament slidably mountable on the wire by insertion of the wire into the receiving bore.

11. The fluid dispenser of claim 1 wherein the wire is a first hoop wrapped around the suction tube.

5 12. The fluid dispenser of claim 11 further comprising a first ornament attached to the hoop.

13. The fluid dispenser of claim 11 further comprising a second hoop attached to the suction tube.

10 14. The fluid dispenser of claim 13 further comprising a second ornament attached to the second hoop.

15. The fluid dispenser of claim 14 wherein the first ornament comprises a first bead and the second ornament comprises a second bead.
